DETAILED ACTION

Response to Amendment

The reply filed on 21 March 2003 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s):

Applicant has amended independent claim 1 of the elected species of thiophenes of Group I to be "regioselective" which reads on the non-elected species of Groups III, IV, and V -- not on the species of Group I which possesses no such stereoregularity. (See instant specification, p. 12, lines 4-7 which points out that regioselectivity is directed to formula (II) for example.) Also the added claims of 36-37 are not members of the species of Group I, but belong instead to one of Groups III, IV, or V. Applicant cannot switch species in the middle of prosecution. Election by original presentation prevents the examination of a different invention after a first action on the merits --see 37 CFR 1.142(b) and MPEP § 821.03. The action could be made final, since no claims in the application are drawn to the elected species. However, in the interest of customer service, Examiner is holding the amendment non-responsive to give Applicant the opportunity to amend the claims within the elected species.

See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. **EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).**
